

## X-STATIC® LABCOAT BY META®

x-static

Encompass delivers world class protection and performance in a new innovation – a META® labcoat featuring X-STATIC® antimicrobial technology. Specifically designed to protect the labcoat from bacterial growth, the X-STATIC silver technology offers comprehensive and continuous protection for the life of the garment. The labcoat also delivers superior comfort by regulating temperature, eliminating odors, and reducing static build-up. You will know your labcoat is protected for its usable life because you can actually see the silver!
