

The TechStyles® Product Line

TechStyles is a leading manufacturer of single and limited-use non-woven products such as apparel, bedding, washcloths and cleaners and personal protective equipment designed to enhance the comfort of staff and patients as a means to improving the quality of patient care and outcomes.

Our commitment to a robust product development process has delivered such innovative therapies as Thermoflect® Heat Reflective Technology. This proactive protocol has been trusted by clinicians worldwide for over 20 years to protect patients from inadvertent hypothermia and the serious consequences associated with it.

Our office headquarters are located near Dallas, Texas, with the main manufacturing and distribution center located in McAllen, Texas.
